SKILLS

PROGRAMMING

Languages:

- Java • C++ • C
- Javascript

Framework and Library:-

- React Js • Node Js
- Express Js • Next Js

Databases:-

- MongoDB • MySql

Technologies:-

- CSS • HTML

Tools:-

- Git • GitHub • VS Code
- Postman

CERTIFICATIONS

Introduction to Data Structures and Algorithm | By Codedamn

PROJECTS

AMAZON SELLER TOOL | Link

React-Js, MongoDB, Express-Js, Node-Js

- Developed a niche solution for **Indian Amazon sellers** due to the **market's lack of similar tools**.
- Developed algorithms that empower sellers to calculate Amazon's commissions, fees, and profit margins swiftly and accurately based on user inputs
- Utilized **React.js** to create a user-friendly interface, making it easy for sellers to input data and calculate profits instantly.
- Significantly reduces seller time by *up to 95 percent*.
- Utilized **MongoDB** to securely store and manage data, ensuring scalability and flexibility and **Express.js** for robust backend functionality.

USER TASK MANAGEMENT | Link

React-Js, MongoDB, Express-Js, Node-Js

- Developed a website for managing users and their assigned tasks within a specific department.
- Enabled functionality to add new users, assign tasks, and track every aspect of users and their assignments.
- Utilized React.js to create a user-friendly interface for efficient task management and real-time updates.
- Integrated MongoDB for secure and scalable data storage, with Express.js ensuring robust backend API functionality.

EXPERIENCE

7SEASOL | FULL STACK DEVELOPMENT INTERN

Jan 2024 – May 2024 | Surat, Gujarat

- Developed full-stack web applications using the MERN (MongoDB, Express.js, React.js, Node.js) stack.
- Designed and implemented user interfaces with React.js, enhancing user experience and engagement.
- Built and deployed RESTful APIs using Node.js and Express.js for seamless data handling and communication between the frontend and backend.
- Managed and optimized MongoDB databases, ensuring efficient data storage and retrieval.

ITECHOPS | SOFTWARE DEVELOPER TRAINEE

Jun 2024 – Oct 2024 | Ahmedabad, Gujarat

- Worked on two live projects using React.js and Next.js, handling API integration and frontend UI development.
- Developed several demo projects using the MERN stack, showcasing proficiency in MongoDB, Express.js, React.js, and Node.js.
- Collaborated with team members to troubleshoot issues and enhance application performance.
- Actively participated in live projects, collaborating with cross-functional teams to deliver high-quality software solutions and enhance technical skills.
